## Skills

- **Languages**: C++, Java, Python, JavaScript, C
- **Framework:** HTML, CSS, JavaScript, SQL
- **Tools**: MySQL, Excel, DBMS, Power Bi
- **Soft Skills**: Time Management, Problem-Solving, Decision Making, Teamwork, Adaptability.

## Projects

**Airport Passengers Traffic Analysis Dashoard – Power Bi |** Dec' 2025

- Built an interactive multi-page Power BI dashboard to analyze monthly airport passenger traffic, uncovering trends in growth, seasonality, service types, and geographic distribution using advanced visuals and slicers.
- Designed a Star Schema data model (Fact & Dimension tables) and performed data cleaning and transformation in Power Query, ensuring optimized performance and accurate analytics.
- Developed DAX measures including *Total Passengers, YoY Growth %, MoM Change, and Transit Passenger Share %* to deliver actionable, KPI-driven insights for executive-level decision making.

**Tech used**: Microsoft Power BI Desktop, Power Query Editor, DAX, Star Schema Data Modeling, CSV Data Sources.

**Operating System Project : Page Replacement Algorithm Simulator |** Apr' 2025

- Designed and developed a Python-based Page Replacement Simulator implementing FIFO, LRU, and Optimal algorithms to analyze and compare operating system memory management strategies.
- Evaluated page fault performance across algorithms using automated outputs and data visualizations, enabling clear comparison of efficiency and behavior under different workloads.
- Strengthened understanding of OS memory management concepts by simulating real-world page replacement scenarios and analyzing their impact on system performance.

**Tech used**: Python, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook, VS Code, Git & GitHub.

## Summer Training

**From Data to Decisions : A Hands-On Approach to Data Science |** Jul' 2025

**Anime Recommendation System using Data Science & BI Tools:**

- Gained hands-on experience in data analysis, visualization, and machine learning to solve real-world business problems, strengthening practical skills across multiple analytics tools.
- Worked with Python (Pandas, NumPy), SQL (joins, filtering, aggregation), Excel, and Power BI for data cleaning, preprocessing, EDA, dashboard creation, and implemented ML models using Scikit-learn.
- Improved data processing efficiency and built dashboards and ML models that enhanced insight extraction and supported decision-making, achieving a ~30–40% faster analysis workflow.

**Tech used**: Python (Pandas, NumPy, Matplotlib, Seaborn) · SQL · Excel · Power BI · ML.

## Certificates

- Master Generative AI & Generative tools(ChatGPT & more) | Aug' 2025
- ChatGPT-4 Prompt Engineering : ChatGPT, Generative AL & LLM| Infosys | Aug' 2025
- NPTEL – Cloud Computing | IIT - Kharagpur| May' 2024

## Extracurricular Activities

- Hackathon Participant | Code Off Duty | Mar' 2023

## Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology Aug' 2023-Present
  Computer Science and Engineering; **CGPA: 7.1**
- **Star Public School** Khairthal, Rajasthan
  Intermediate**; Percentage:82%** Jun' 2021-May' 2022
- **Central Academy School** Khairthal, Rajasthan
  Matriculation; **Percentage:76%** Jun' 2019-May' 2020
